Auctioneers: Rob Mandanici (lead auctioneer), Terry Finlayson & Malcolm Brown

Welcome to Sale 37, an auction originally planned for May this year. Unfortunately tragic circumstances resulted in its deferral resulting in this jumbo 4000 lot sale from 70+ vendors with pre-sale reserves exceeding \$750,000.

It was with great shock and sadness that **Marc Poupart**, our IT guru and member of the team since our very first auction in November 2008, passed away suddenly. His university assignment back then was to build and operate a public auction computer system. His enthusiasm and skill in everything IT was clear and we agreed he would apply all he had learnt to the very first Ace Stamp Auction. We often looked back at this first attempt that resulted in a lot of manual calculations and administration done on crates of Legacy Christmas Puddings at the back of our original venue! Thereafter steady improvements over several years resulted in a robust and efficient purpose made system that proved essential to an efficient auction. Many of you who attended our auctions knew him as the mild mannered and quiet but ever helpful young man who sat next to Christine in the administration office. He was an active member of the local SES team whilst working in the state's Education Department in IT. He is survived by his wife Simone and their 2 young children and our sincere condolences are with them all. He will always remain as a fondly remembered and celebrated member of the founding "Ace" team.

This tragic passing was followed by the unexpected passing of well known and recognised member of the philatelic fraternity, **John Collette**. His sister Suzanne reflected that John was eighteen months her senior and were constant companions growing up in both Sydney and Perth. She continued "He didn't make friends easily. I think he had undiagnosed autism but was high functioning in some areas. His abilities to retain information, process knowledge and focus on things he was passionate about were phenomenal. He was socially awkward except when talking about his interests - stamps, warfare and model kit making, politics and cricket! He studied Political Science at UWA, Perth, and started a Masters Degree in Social Anthropology at the ANU, Canberra, before deciding he could earn more money following his great interest in philately. Consequently he became a stamp dealer around the early 1980's and continued to live in Canberra until 2015. He spent many years regularly attending stamp auctions buying and selling, especially in Sydney, Canberra, Melbourne and Perth. He made friends with the dealers and collectors he met over the years. He started seriously collecting again several years ago and was proud of how his own collection was progressing." Needless to say, it is a great privilege to have his material in this auction and as highlighted at the start

of the collections section, the high quality of his material and presentation is undeniable and was the envy of many. His presence at both our viewings and on auction day will be missed as will be his willingness to share his knowledge which always perfected our auction descriptions!

As a result of the gap left in IT, I scoped far and wide to secure a bespoke auction system and website specialist. It was therefore great to discover Tandem Auctions systems in New Zealand and the owners Scott and Edevine Wackrow. They successfully transferred all the Ace data onto their platform which as you will soon discover, has a massive range of benefits to the collector including the ability to log into the website and enter your own bids whilst tracking your previous purchases and the current status of your bids. The new look website attractively presents all the lots with images and descriptions combined with an easy-to-use login function and bidding system. Obviously for those of you receiving the catalogue in the mail you can still email or even post your bid forms however I would encourage you to use the new website as the mailing of 1000 printed catalogues is wasteful of both money and valuable resources especially when 200 pages! The quick and easy online bidding system will also save you time. You will note that we have needed to increase our Buyers Premium to 17% (plus GST), partly due to the recent government legislation requiring us to remove the surcharge for using credit cards. However, rest assured you will continue to receive the benefit of an excellent service and we remain one of the lowest, if not the lowest of any public auction house in Australia.

In closing, my thanks to all the vendors for their patience and understanding in the deferral of the May sale. John McPhee has once again excelled in the detailed describing of the collections plus it's my pleasure to welcome Malcolm Brown to the describing team. Many of you will know of his passion and knowledge when it comes to everything West Australian related including postmarks, postal history and revenues and this is reflected in his work on the late Chris Sykes and Trevor Spencers material in this catalogue.

Our next auction is planned for early 2027 and we are currently accepting consignments so please contact either myself or John McPhee to discuss and arrange collection.

In closing, and I know it's only October, but Christine and myself wanted to wish everyone a very Happy Christmas and New Year and thank you all for your continued support of Ace Stamp Auctions.

Ian Boulton

Bidding online is easy

A short guide to placing your first bid on our new website

If you have always bid by post or email, you are still able to do this. However, online bidding is faster, and you can see straight away whether you are the leading bidder. **Registration is in two steps:** you create your Ace account once, then register for each individual auction. You can browse the full catalogue, view every lot in detail, create a wishlist and submit your bids anytime up to an hour before the auction session.

YOUR MAXIMUM BID STAYS PRIVATE

Your maximum bid works exactly like a traditional written or postal bid. It is never shown to anyone else, and our system only bids on your behalf as far as the competition requires. You will often buy for less than your maximum, and we email you if you are outbid during prebidding.

1 ONE TIME ONLY Create your Ace account

Login Register

Look for these at the **top right** of every page

1. Go to **acestampauctions.com** and click **Register** at the top right.
2. Enter your name, email address and a password.
3. We email you a confirmation link. Click it to activate your account.
4. If the email does not arrive within a few minutes, check your junk or spam folder.

Already have an account? Just click **Login**. If you have forgotten your password, use the reset link on the login screen.

2 ONCE FOR EVERY AUCTION Register for the sale

1 Identity 2 Phone 3 Address 4 Payment
Four short steps, with your progress shown as you go

1. Open the auction from **Auction Calendar** and click **Register Now**.
2. Read and accept the buyer terms and conditions.
3. Your credit card details are processed by **Stripe** and are never saved on our system.
4. If we need any further detail your registration is set to **pending** and Ace will be in touch. Otherwise you are ready to start bidding.

If you have registered for a sale online with us before, future sale registrations are a single confirmation. You do not need to repeat details again.

3 UP TO AN HOUR BEFORE Browse, shortlist and bid

Auction Details View Catalogue Categories Wish List My Bids
Every auction has its own menu across the top

1. **View Catalogue** shows every lot in full. Use **Categories** or the search to go straight to your specialty.
2. Add anything that interests you to your **Wish List** to build a personal shortlist you can come back to.
3. We are transparent about reserves. The estimate on each lot is the reserve.
4. Set an **Auto Bid** up to your maximum, or untick the Auto Bid box to place an immediate bid. Either way, bidding follows the set increments.
5. Lots are colour coded in every view – catalogue, Wish List and **My Bids** – so you always know where you stand.

Green – yours is the leading bid Red – you have been outbid

Prebidding runs as an open online auction, so you can always see the current bid. Any new or adjusted bid must be above it. Where two bids match, the one placed first leads.

4 AUCTION DAY Join us, or leave it with us

1 HOUR BEFORE	Online bidding closes
IN THE ROOM	Lots called by the auctioneer
AS LOTS CLOSE	Unsold may go to "Buy It Now"

1. We would love you to attend in person. There is nothing quite like being in the room on the day.
2. If you cannot make it, there is nothing further to do. The auctioneer executes your bids exactly as with a written bid.
3. Once prebidding closes, the catalogue shows where it ended. That figure becomes the opening bid for the lot in the room.
4. **"Buy It Now"** lots are first come, first served, so it is worth checking back throughout the day.

If you are successful, you will receive an invoice by email, or in person on the day.

COINS & BANKNOTES - Grading & terminology used in this catalogue

Proof: Proof coins are struck using specially hardened dies & highly polished blanks. The result is great clarity & depth of detail. Most modern proofs (1966 onwards) contrast a brilliant mirror background against delicately frosted detail.

Prooflike: Often a non-official mint strike, or medallic in nature.

Brilliant Uncirculated (B/Unc) or choice Unc: Uncirculated, but with higher than normal sheen.

Extremely Fine (EF): Coins shows only traces of wear to high points of the design & only light surface marks from circulating. Otherwise the design is clear and sharp & the coin will have much lustre. Notes are clean & crisp with only the slightest signs of creases and folds.

Very Fine (VF): Lustre has gone and there will be flatness on the design of a coin. Other traces of wear may also be evident. Banknotes of this grade will show distinct signs of handling though the paper will still be reasonably crisp.

Fine (F): The effects of handling will be quite evident from the amount of flatness to the design of a coin. Notes will have clear signs of soiling & heavy creasing, possibly also some tearing.

Very Good (VG): Most details of a coin's design will be all but gone, but the basic design and date are still visible. Notes of this grade are near the end of their useful life & are of little value unless they are rare.

Choice: An exceptional example of the given grade.

Good (g): Use of the prefix good (e.g. gVF) indicates that the item is slightly better than the grade stated.

About (a): Use of this prefix (e.g. aEF) indicates that the item is almost at the grading designated.

What is PCGS Encapsulation?

PCGS is an independent grading company based in the USA. They use a numbered scale to award grades to each coin they inspect from "1" for "worn flat" to "70" for "flawless". Coins in mint state are given the prefix "MS" and are then divided further still with the award of between 60 and 70 points out of a possible maximum of 70. Each coin is then sealed inside a tamper-proof holder with the details of the grade awarded. You will note we have several examples of these in this auction.

As a result of the increased number of box lots and the logistics of storing these and delivering them to the auction venue, we have had to simply list them by lot number below. We have NOT sighted the contents as they are being delivered by the respective vendors on the auction day. On the basis all box lots need to be paid for and collected on the day, we rely on the successful bidder to have viewed these before the auction. Those box lots with extended descriptions have all been viewed by the describers here at Ace Stamp Auctions & thus we can vouch for the contents. Thank you.

WORLD COLLECTIONS, ACCUMULATIONS & SELECTIONS

Those collections with "(JC)" at the end of the description are from the late John Collette and as such, are stored in "as new" Lighthouse stockbooks with black interleaved pages for MUH/MLH & white pages for the used. For those that knew him, he was committed to obtaining the highest standard when collecting, securing the very best examples where possible thus you can assume that MLH is very likely to be MVLH while the MUH will be fine and fresh. His ambition when it came to used, was to only collect fine used with genuine postmarks attached to that country and period thus once again you can assume that these will meet this criterion. The "JC" code simply means we do not have to elaborate on the condition or housing of the stamps each time. Meanwhile the numbers in brackets indicate the number of stamps and the current SG Catalogue value, again of which he kept an accurate note for each volume.

2757	2½d indigo, Die II in horiz pair with "missing "1" in fraction" variety in left stamp. MLH with aged gum tan line but frontally fresh. Includes a comprehensive 2-page letter by Michael Drury accompanying his certificate (2026) explaining the progressive state of this variety with a similar example currently appearing on the front cover of the current ACSC 2025 Kangaroo catalogue. That example was lot 30568 in the "Dubois" Corinphila Auction Sale 111 (2023) which sold for \$65,000. Both are of the "late state" recognised by the fact it "breaks into two parts the horizontal fraction bar in addition to a small encroachment of the right side of the "2" to the left of the fraction". This example was originally in the Herbert Fortescue McNess collection sold by Harmers, Sydney in the late 1970's however was returned from the sale because of conflicting certificates & differing opinions, all of which are included with the lot plus some of the original black & white photos showing the gentleman himself & other major highlights from his collection. This new discovery will become an important part of future research and the listing of the different states. A wonderful lot with all accompanying documentation & the signed letter by Michael Drury. - 3238 1948 (22nd Mar) 6 page Telegram from Heard Island to Melbourne on RAAF Forms "A.ss (Revised May, 1942)" with red title strip on each page. Signal Department "A.H.M. - 8/42 - B2913" at base with typed message from "Camp Atlas Cove Heard Island". Sent by Aubrey Gotley, OIC Heard Island Meteorological Stations detailing cyclonic events of the 14th July (1948). By 9pm a wind gust of 108mph was experienced & was the strongest recorded since the establishment of the weather station. Other details provide a commentary on the affects of the cyclone on local fauna. Last page torn, reinforced & repaired otherwise fine cond. An interesting & important piece of the Antarctic story. A second transmission under "Australian National Antarctic Research Expedition" letterhead was sent from Harry Thornton, a member of the 1950 expedition & authorised by Dr Phillip Law, Officer in Charge, Arctic Division with a brief Christmas & New Year greeting. Heard Island was formally claimed by Britain in 1910 until administration & management was transferred to Australia in 1947. (7 items) \$300

Not overly dis-similar to the final design being in the same shades of blue. Still mounted to original design "Fashion Plate" board & lettered "B" being the second drawing by Lyle. Framed by simulated perforations measuring 23cms x 15cms & labelled "Comprehensive "Rough" for Finished Line Original". Richard Breckon has confirmed that there is no preliminary artwork for the Joint Issue in the Australia Post Archives. However, several die proofs inscribed New Zealand are held by Australia Post. This confirms preliminary designs can properly be treated & exhibited as Australian material also. Most attractive & a wonderful introduction piece to a New Zealand or Australian/NZ Airmail exhibit.
